THREE BETTER HIGHWAYS ADVOCATES ADDRESS MEETING

Urge Construction of Highways on Business Basis, and thus save Millions of Dollars to Province. Active and Unselfish Work being done by Central Executive. Thousands of Tourists come this way from California. Efforts Being Made to Have Trans-Canada Road pass through Edmonton.

In our report of the Auto and Good Roads association meeting in last issue the reports of the addresses were crowded out on account of lack of space. We therefore, give below a synopsis of the three principal addresses, which will be read with great interest by all interested in the question of good highways throughout Northern Alberta.

John Bue Shows Where Large Sums Can be Saved

On being called, Mr. Bue referred to the objects of the Automobile and Good Roads association being as important to the farmer as to the city automobile owner. Good roads reduced the cost of transportation and consequently the cost of production, which was the great desideratum in these times when every item of cost only should be included in a public program. It was important that the man who drove a good team of horses and loaded wagon from his farm yard to his market town should have a good road, possibly more important than for the city dweller with a Hudson Super Six. The most valuable piece of land a farmer used was the strip of good road from his front gate to his nearest market town.

He referred to the fact that freight vehicular traffic in Alberta cost about 30 cents per mile, and, if through building good roads, this could be reduced a few cents, it would save the farmers of the province from two and a half to three millions of dollars.

The same might be said of automobile traffic. The automobile mileage of the province in 1921 was about 185 million miles, costing about 15 cents per mile. If this could be reduced to 10 or 12 cents, it would mean a similar saving, say one and a half million dollars, to the motor owners.

He referred to the necessity for a first class trunk road from the American border to Edmonton to attract the thousands of tourists who annually come north as regularly as the wild geese. He pointed out that the tourist traffic was one that brought large sums of money into the country and promoted good business in the towns and cities, and was an important factor in advertising the country.

He argued for the Trans-Canada highway following the old trails of the early explorers across Canada, through the fertile belt to the Pacific coast via the Yellowstone pass, the most southerly pass in the Rocky Mountains that was open the year round. The beautiful clear nights and twilights were a great attraction to the southern tourists, and Alberta should be alive to the possibilities of making this province as attractive as possible to the people of the middle and southern United States. If five per cent of the car owners of the United States spent from one to two weeks in this country it is estimated it would mean an expenditure of \$300,000,000 per year, an amount in excess of three-quarters of the total annual revenue of the Dominion government.

Dr. Hope Wants Commission Appointed

Dr. Hope, chairman of the Good Roads committee, urged the construction of highways on a business basis by placing the entire control of all expenditures in the hands of a highways commission, headed by a competent construction engineer, making it possible to plan and construct highways according to recognized engineering and business principles. Indicating the necessity for the change, figures were quoted showing the excessive cost of the present department as compared with the proper cost of an efficiently organized highway department.

Proceeding, he quoted figures, as far as can be gleaned from the present system of keeping road costs, to show that the inefficient construction of

RED DEER DEFEATS WETASKIWIN HIGH AT BASKET BALL

Saturday last was a big day in basketball circles in Wetaskiwin as two teams came up from the Red Deer high school to play representatives of the school here.

The girls' game was very keen and exciting, and resulted in a tie, but the boys were outplayed by their opponents from the south, the score being 40 to 14. The visiting boys were larger than the locals, and showed better combination and team play. The Wetaskiwin boys are now working hard, and hope to give the Red Deer sextette a very close game when they make the return visit early in June.

WETASKIWIN WINS TWO BALL GAMES

On Thursday last the Wetaskiwin ball team defeated Ponoka at the latter town 10 to 3. The game was well played throughout and evenly contested until the seventh inning, when Wetaskiwin scored four. Kadlec did the hurling for Wetaskiwin and received excellent support from his teammates.

The Wetaskiwin lineup was—McQuitty, 3b; Ryan 1b; Chandler ss; Gardner, c; Donnelly, cf; Vau Jr; Barnhill, rf; Kadlec, p.

Cherry Grove vs Wetaskiwin

Tuesday evening, Cherry Grove and Wetaskiwin played an exhibition game at Diamond Park, Wetaskiwin winning 10 to 4. The Wetaskiwin boys showed considerable improvement since their last home games, particularly in the hitting department. Manager F. Abousaffly has made several changes in the lineup and batting order, and should have a decided improvement.

Batteries—

Wetaskiwin—Graves, Kadlec and Gardner.
Cherry Grove—Luther, McKenna and Eikeman.

Today's Game

What promises to be a real good ball game is announced for the afternoon of Victoria Day, at 3.30 p.m., when the I.O.F. team of Edmonton meet the Wetaskiwin aggregation on the diamond here. The local team has been reorganized, and it is expected to give a good account of itself. The old veterans, Del Gouche, will do the receiving for Wetaskiwin.

In the whole dominion there were 24 outbreaks involving 1,741 hogs, of which 359 hogs were slaughtered, compensation of \$5,466 being paid.

W.M.S. VISITS HOBBEWA

On Monday evening the W.M.S. motored to the Methodist mission at Hobbeewa and spent a social evening. A short but very much enjoyed program was followed by an address of appreciation from the chief.

Refreshments were served and the party enjoyed a delightful homeward drive.

The W.M.S. wish to thank all who so kindly contributed to the success of the evening, especially those who provided cars.

CARD OF THANKS

The undersigned wish through the columns of The Times to sincerely thank the neighbors and friends for their expressions of sympathy and for the assistance rendered during their recent bereavement.

R. J. and G. A. Watson.

OBITUARY

MABEL M. POOLE, B.A.

A gloom was cast over the entire community when it was learned Tuesday afternoon that Mabel Minnie, eldest daughter of Mr. and Mrs. John Irving Poole, of this city, had passed away. She was taken ill a few days ago, at Vegreville, and went to the hospital there for treatment. A couple of days later she was removed to the Royal Alexandra hospital at Edmonton, where she underwent an operation on Sunday. The operation was successful, but Mabel did not have the strength to withstand the shock to the system, and she passed peacefully away on Tuesday morning.

The remains are being brought from Edmonton this (Wednesday) evening, and the funeral will take place Thursday afternoon. Service will be held in Knox church, commencing at 2.30 o'clock, and the interment will be in the Wetaskiwin cemetery.

MRS. PRIEBE

There passed away on Thursday of this week, Alvina Matz, wife of Emil Prieb, at the age of 48 years and nine months. She had been a patient at the sanitarium near Calgary for some time, and returned to Wetaskiwin a few days prior to her death. She was born in Poland, and was one of the early settlers in this community.

The funeral took place Sunday afternoon, services being held in the German Lutheran church. She leaves a mother, Mrs. Matz, and a sister, Mrs. K. Detheber, both of Wetaskiwin.

C.W.L. TEA AND SALE

MOST SUCCESSFUL

The tea and sale held by the Catholic Women's League on Saturday last was most successful. The event was formally opened at three o'clock by Mayor Montgomery.

The mayor's kind wish that the financial result would exceed expectations was literally fulfilled, that those in charge desire his similar good wishes for all future undertakings.

Mrs. Krowch was general convener, and in that capacity gave a fine example of what real and hard work can accomplish. She also had special charge of the plants, and the excellent display called forth sincere admiration.

The stock of house dresses, aprons, etc., was under the generosity of Mrs. Pelter and the amount realized from this branch far surpassed that of last year. Mrs. Christopher had care of the food table, and its good quality was proved by the financial result.

The tea room was under the able direction of Mrs. Mignault, who was assisted by several of the ladies as well as the 'teen age girls. Mrs. Kelley and Mrs. Fillatreault poured tea.

Mrs. Heaney was convener of the reception committee. Other members of the league assisted in various ways.

The drawing for the buffet skirt kindly donated by Mrs. A. G. Gross also took place on this occasion, and was won by Mr. E. H. Abousaffly. During the afternoon music was furnished by Mesdames Condie, Atkinson and Schneider, and Miss Rita Hanson, Oriole Mignault and Helen Pelter, and Mr. Byron Hanson.

The proceeds of the sale were approximately \$200.00 and the buffet skirt realized \$25.00. The members of the C.W.L. express their sincere thanks to all who by their music added so much to the pleasure of those present, and also to those who were so generous in their purchases, thereby making the event a success.

ANNOUNCEMENT

Mr. and Mrs. Adam McLean announce the engagement of their daughter, Margaret Elizabeth, to John N. Martin, B.S.A., of Dairly, Alberta, the marriage to take place early in June.

Card of Thanks

P. T. Kristien wishes through the columns of The Times to sincerely thank the members of the Wetaskiwin fire brigade for the quick response made to the alarm and for the effective work done in saving his slaughterhouse from destruction by fire Monday afternoon. It was the prompt action of the brigade that saved him a big loss.

NEW KIND OF HOPPER IN ALBERTA; PLANS MADE AGAINST PEST

All field men of the provincial department of agriculture met at the Fairbair Hotel, Calgary, last week to discuss the campaign against grasshoppers. The province from the boundary almost as far north as Edmonton has been divided in 19 districts and a representative of the department has been placed at the head of each.

Mixing stations have been established in each district and from these stations the farmers can get their grasshopper bait already mixed and ready to distribute. In the organized districts the Dominion government shares equally the cost of the bait with the municipal councils, and in the unorganized districts half of the cost of the bait is charged to the farmers as an item of their taxes.

Mr. Melinovsky, the organizer of the provincial campaign, is located at Edmonton, and already some bait has been spread in districts north and east of Calgary where indication of the pests has been found. A new kind of grasshopper called the "Tricoline" species has found its way into Alberta. It feeds in the soil, going to the grass only when the food in the soil has been exhausted.

The roadside species was the most prominent last year, and in some localities the lesser migratory grasshopper was found and it is believed that this species, which is a long flyer, came in from Montana.

Trouble is likely to be experienced this year only in those parts of the province that were not attended to properly last year, and the outlook is brighter because larger numbers of the red milto and the yellow grub are in evidence. These insects together with the crow prey heavily on grasshopper eggs and will assist greatly in exterminating the pest. Last year, according to count, there were places where as many as 40,000 grasshoppers were found to the acre.

Plenty of bait is now available at the places of distribution—Calgary, Lethbridge, Medicine Hat, Manton and Edmonton. Last year 15,000 cars each containing from 50,000 to 40,000 pounds of bait were distributed, and this year similar quantities will be available.

Although there was considerable stock poisoned last year, the department took great care to investigate each case, and it was found that there is little danger of poisoning stock if proper care is taken in the distribution of the bait, which should be spread at the density of ten lbs. to the acre. Chunks of the bait should not be left lying on the ground and unused bait should not be left in fence corners or dumped in coolers or holes of water. Cars should be taken around the mixing stations.

Last year's experiences will greatly improve the handling of the bait this year. In places where the grass or prairie wool is thick the grass should be burned off before the bait is distributed, but there is no danger to stock on the open fields if 4 lbs. of arsenic to 100 lbs. of the mixture is spread thinly over the grass.

OLD TROPHY FOR AMATEUR BALL

The old beer keg, surmounted by a baseball player, ransomed, donated by the Calgary Brewing Co. many years ago for scrum-pall within Alberta and a part of British Columbia, has had its status changed and is now up for competition by amateur baseball clubs only.

The trophy was held by Vegreville for several years at considerable expense but last year was taken away by the Hawthorn boys who still hold it and who will be now called upon to defend it with a strictly amateur club, if this can be dug up anywhere in the province south of the cities.

A trill of disaster follows this old trophy around. Several towns have held it in the past including Wetaskiwin, Banff, Alton and Vegreville, and the expense of capturing and defending it on a semi-pro basis has always far exceeded its value as a trophy or anything else. The towns so unfortunate as to win it and defend it have passed, speaking basically, into history, temporality at best. It was never worth while in Vegreville, for

RENTAL BASIS OF TAXATION BEING PASSED BY COUNCIL

Supplementary Agreement between City and Hospital to be Made. City Makes Satisfactory Settlement for Two Patients at Sanitarium. Employee asks Increase in Salary. Provincial Sanitary Inspector Makes Report. Council will Consider Question of Oiling Streets.

The regular meeting of the city council was held on Tuesday evening with all members present.

After the reading and adoption of the minutes of last meeting, E. A. Reynolds addressed council on automobile and business tax. He was referred to the city solicitor, who had the matter in hand. Mr. Reynolds also requested a refund of auto tax for the year 1921. This was referred to finance committee.

C. H. Russell, collector, wrote re J. F. Richards' auto tax, he being taxed for car valued at \$550.00 instead of \$550.00. The council resolved to have Mr. Richards' car placed in correct or lower class.

The Provincial Sanitary Inspector wrote re the sanitary conditions of Wetaskiwin. The report was received and filed and Chief of Police will be given a copy of report with instructions to carry out recommendations.

Mrs. Ben Portis offered \$300.00 for property and buildings formerly owned by Mrs. Portis, ar. The offer was accepted on motion of Chandler and Gohard.

Robt. McPherson wrote asking for an increase of salary from \$95.00 to \$110.00 a month. Referred to the power plant and gas well committee to report at next meeting.

C. H. Russell, city solicitor, reported on the city's Chinese restaurant cases. The report was adopted and account passed for payment.

Frank Lucas wrote regarding water account now charged against his property. Referred to the light and water committee.

E. C. Schmidt wrote asking city to place crossing and culvert at his property on Stanley street. Referred to public works committee to report at next meeting.

His Worship reported having made settlement of accounts for two patients in the sanitarium at Calgary, having succeeded in getting quite a reduction. The council expressed its appreciation of the good work done by the mayor, and the report was received and adopted.

The solicitor and secretary were instructed to write to relatives of deceased patients who were in sanitarium in an endeavor to arrange for payment of accounts.

The finance committee made several arrangements which were approved.

The public works committee recommended the sidewalk petitioned for by residents on Lansdowne St. be built by city employees insofar as possible. The estimated cost is \$60. The report was adopted.

It was also recommended that Supt. Watson do no further work on streets with grader until instructed by public works committee.

A Brickman presented account of \$22.50 for labor and material at manure ground. Account was passed for payment.

Mr. Brickman also had an account for planting 116 trees at cemetery, instance, for the citizens to dig up hundreds of dollars to support semi-pro baseball players for competitive play during the season; yet there was necessary if trophy were to be defended with any hope of retaining it.

It is probably an excellent thing to turn the trophy over for amateur games, but in doing so the trustees might as well have ordered it handed to Edmonton or Calgary forthwith as none of the smaller towns can hope to turn out a strictly amateur team capable of competing with those from the cities.

Vegreville kissed the beer-keg goodbye last year, and how that it has been passed on for amateurs, we give it a last, long farewell forever.—Vegreville Observer.

amounting to \$42.50. Passed for payment. The public works committee was instructed to fix sidewalk in front of Massey Harris property.

Supplementary and reconstruction accounts were passed for payment.

Bylaw 468, providing for the fixing and levying of taxes on rental basis for the year 1923, was read the first and second times. According to the bylaw, the businesses in the city are arranged in schedules, with a graduated rate of per cent for each schedule. The division is as follows:

Ten per cent on—Apartment houses, Bottling Works, Hotels, Photographers, Theatres, Vulcanizers, Wood Yards.

Fifteen per cent on—Barbers, Boot and Shoe Dealers, Boot and Shoe Repairing, Butchers, Billiard Parlors, Bowling Alleys, Pool Rooms, Bakers, Confectionery stores, Refreshment Parlors, Dressmakers, Dry Goods Stores, Furniture, General Stores, Gent's Furnishing Stores, Groceries, Garage, Harness Shop, Hardware, Laundries, Musical Instruments, Milliners, Photo Dealers, Printing, Offices, Restaurants, Stationery Stores, Second Hand Stores, Tailor Shops, Wholesale and Retail Tobacco, Confectionery or Soft Drinks.

Twenty per cent on—Acetylene Welders, Blacksmiths, Coal Dealers, Creameries, Cheese factories, Chop Mills, Carpenter Shops, Drug Stores, Pumps, Sheds, Real Estate Offices, Tailors (gins), Flour Mills, Freight Sheds, Feed, Livery or Sale stables, Insurance Offices, Implement Dealers, Ice Dealers, Jewelry Stores, including optical and repair departments, Lumber yards, Machine Shops, Painters, Plumbers, Pump Shops, Real Estate Offices, Tailors (gins), Veterinary Surgeons, Watch Repairers, Wall Paper Dealers.

Twenty-five per cent on—Banks, Railway Ticket and Telegraph Offices, Including Waiting and Baggage rooms, Undertakers and Embalmers, Wholesale Merchants.

Thirty-five per cent on—Barbers and solicitors, Chiropodists, Dentists, Physicians and Surgeons, Railway Express Offices.

His Worship was authorized to grant a tag day to the committee who are taking an interest in the welfare of the 'teen age boys and girls in the city; also to the Salvation Army, which has made a request for a tag day in connection with their self-denial campaign.

Ald. Furber brought up the matter of having Pearce street closed, and suggested that council obtain cost of having this work done. The secretary was instructed to lay all information he has before the council at its next meeting.

The police committee recommended that additional help be provided at the fire hall for sixty days at \$29.00 a month.

Ald. Liveridge gave notice that he might introduce an amendment to the license bylaw at next meeting.

His Worship brought up the matter of condition of crossing of railway track at Pearce street. The C.P.R. will be requested to furnish a carload of cinders gratis to fix this crossing.

Mr. Montgomery stated that the agreement between the city of Wetaskiwin and the hospital board was not entirely satisfactory to the provincial board of health, as that board required a clause added to the contract to the effect that in the event of the hospital showing a deficit the municipality of Wetaskiwin could be held liable for payment. A resolution was passed that a supplementary contract be prepared to meet the requirements of the provincial board, all the aldermen being in favor excepting Ald. Liveridge, who opposed the proposal, and asked that his vote be recorded against the motion.

Meeting adjourned.

WAS OVERSEAS 3 YEARS**Returned To Canada****Almost A Week**

Mr. F. M. Dlugolec, Morinville,

Alta., writes: "After three years service overseas I returned to Canada almost a complete wreck. I had been

guessed and was suffering from shell

shock and rheumatism, and was so nervous

I could not sleep at night. I was so

bad in the fall of 1919 my hands got so

shaky I could scarcely hold anything in them, and it

recurred to me as if I had a steel hand

pressing on my head. The least excitement

would almost drive me into fits, and my

whole system seemed to be in disorder. I

had cramps in the calf of my legs nearly

every night and hot and cold chills running up and down my

back nearly all the time. One day I decided

to try Milburn's Heart and Nerve Pills, and

after I had taken six boxes I began to feel better. I kept on using them

and after a while was completely relieved. Now I sleep like a

log, never feel any pain, weigh 250 lbs. and work every day."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

**CANADA TO ENGLAND IN
THIRTY HOURS BY 1926**

Regular daily flying passenger service back and forth across the Atlantic will be an accomplished fact in 1926. And the trip—each way—will be made in about thirty hours. That is what noted aviators expect now that plans outlining in detail the establishment of this extraordinary service have been completed.

It is proposed to construct eight gigantic stations which will be anchored at intervals of 400 miles across the Atlantic ocean. By a method which has been perfected it will be possible to anchor these stations in fixed places and stabilize them so that they will be free from the roll and pitch which even the mammoth ocean liners are subjected to.

Each station or "seadrome" will be 1200 feet long, 400 feet wide and have a platform of eleven acres on which the seaplanes will alight. A crew of about 15 men will be stationed on each seadrome. There will be a complete radio-telephone and wireless telegraph receiving and broadcasting stations, meteorological bureau, aeroplane repair shop and hotel accommodation for guests desiring to stop over night. Between stations, huge buoys—one every fifty miles—illuminated at night, will mark the course of this new White Way.

Ten planes will leave the Canadian terminal daily, and ten other planes will leave England each day. The planes will carry from 20 to 30 passengers and will have additional space for carrying mail and express packages equivalent in weight to one-half the total passenger load.

At no time will a plane be more than one hour and a half away from a station. Stopover at the stations will vary from 15 minutes to half an hour. The planes will travel at a speed ranging from 100 to 150 miles per hour, and at times possibly up to 200 miles an hour, providing there is a favorable wind.

The proposed course across the Atlantic will be south of the line that divides the ocean into what might be called "two weather parts" below which the ocean is free of 95 per cent of the hazards caused by fog, storms and icebergs.

NO SAFETY

The spuds are white and mealy, I like them smoking hot; but if I eat them freely my doctor cries, "Great Scott! You weigh too much already, yet such things you will chew! Your gain in weight is steady, fit spite of all I do! Your face is hot and hectic, your pulse hits up a gallop; a spasm apoplectic will get you soon or late." The roast is large and stately, the gravy rich and brown, and I am longing greatly to pour such victuals down. But says the learned physician, "Cut out such grub as that, or soon the pale mortician will bear you from your flat. I have to watch and guard you throughout the weary years you blamed old bonedhard bard, you, to save you from the bier." Such is the fate of fellows who do not toll or spin, who ply no blacksmith's bellows, or make cars out of tin; in gilded ease reclining, their lot seems far from hard; but when it comes to dining all goodly things are harnessed. I watch the fatter plodding, as homeward he repairs, from ditching or from sodding, to eat five Belgian hares. I think his lot's a daisy, no doctors round him lurk; but I am too blamed lazy to go outdoors and roam.—Walt Mason.

**HIGHEST PEAK IN
CANADIAN ROCKIES**

Mount Robson National Park holds for the tourist and explorer new trails through new wonderful lands in a great unspoiled Alpine kingdom, where nature and beauty vie with each other. It is a country abounding in big things; majestic peaks, deep canyons and water falls. In fact, it is doubtful if anywhere in an equal area such mountains scenery and wonder features can be found. Camps are located in Mount Robson Park for the accommodation of tourists, where saddle horses and pack horses are available. An observation platform has been constructed by the Canadian National Railways, at Mount Robson station, where all trains stop for a few minutes to afford the travellers an opportunity of viewing this vast and amazing territory. Mount Robson the highest peak in the Canadian Rockies, is plainly seen from the train.

The "Continental Limited" on route to the Pacific coast traverses this new playground, and for many miles follows the North Thompson and Fraser rivers, remarkable in beauty and interesting in history. Mountain observation cars composed largely of glass, are attached to the "Continental Limited." This new innovation on the mountain division of the Canadian National railways allows unobstructed view of the scenery on both sides of the track and affords protection from sun or rain.

**Not Sick Once In
Four Years Now**

**MRS. SMITH DECLARES HEALTH
IS PERFECT SINCE TANLAC
— ENDED STOMACH TROUBLE**

"For ten years hardly a day passed that I didn't suffer from stomach trouble, but I took Tanlac four years ago and haven't had a sick day since." is the remarkable statement made recently by Mrs. Thamar Smith, 55-McGee street, Toronto, Ont.

"The little I managed to eat simply tortured me with pains in the pit of my stomach, and gas pressed around my chest causing it to skip beats until I thought it would stop altogether. I was as nervous as a witch, and lost so much sleep that I was dark and swollen under my eyes. I was so weak and run down I could hardly walk a block or do my housework, and was almost in despair.

"Tanalac was certainly a godsend in restoring me to such perfect health, and I think it's the greatest medicine ever made. Nearly everybody also on McGee street seems to have used the treatment, and are praising it too."

Tanalac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Shop where you are invited to shop. The ads are your invitation to the stores of aggressive and successful business men.

How the Udder of a

valuable cow was

saved

Chas. K. Robbins, of Chelapeau Point

Vancouver, writes:

"A recent experience in relation

to a valuable cow of mine has demon-

strated again the great worth of

Milkmaid's Linctus. I can recommend

it in the plainest terms to all who have

a herd of cows.

"For years I have never considered my

herd of cows complete without a

bottle of Milkmaid's. For hoarseness,

coughs, frolics, and all other evils. And I know of no better remedy for a

coughed cow."

"I think I can say in saying that among

all the cow remedies there is none

that is so good as Milkmaid's Linctus. A real

cure for all cow troubles."

So often when we are visiting we say: "It is a shame to sell your pretty guest towels. I will just use this one." Then we take one that belongs to some member of the family when our hostess would greatly prefer that we use the towels provided for us.

CANADIANS TO U.S.

Washington, May 14.—At a conference with officials at the immigration department today, Secretary of Labor Davis reported that 62,000 Canadians have come to the United States within the last nine months. The head tax of \$8.00 had been collected from all of them, he said.

**Same car—different power**

Two cars of the same make and age:—One beats the other on hills and stays out of the shop. Why?

Ten to one, oil is at the bottom of it. You can't expect good performance on thin oil or gummy oil.

**SUNOCO
THE DISTILLED OIL**

is as pure as oil can be made. There's no "cylinder stock" in it. It's real lubrication. Six types insure a proper oil for your kind of motor. You'll be proud of your car if Sunoco does the lubricating. Try it. Your old car may have more life than you'd thought.

Ask your Sunoco dealer for booklet,
"What's Happening Inside Your Motor!"

Buy At Home

AND DIVIDE YOUR DOLLAR WITH YOUR NEIGHBOR

Everybody has a certain amount of Civic Pride—that sort of pride which helps make a village a town and a town a metropolitan city.

The growth of any community is dependent upon the support given its citizens. If we fail in our cooperation the town either stands still or retrogrades. If we uphold the town by sustaining it wholeheartedly we help ourselves and the community. The theme of this advertisement is "Help our town, buy at home"

Let us divide our dollars among our merchants and fellow-citizens who have the interests of the community at heart. Help them and they will help us to greater values—for increased volume means decreased costs.

The city needs our support and we need the support of the town. Let's get together and share our fortunes.

BETTER
NOT SAY IT!

Bad news travels faster than good news. There is an old saying, "No news is good news." Let a man be converted at a church service, and there is not much of a stir, but let a resident be convicted of a crime and the news leaps from word of mouth from one end of the community to the other. How thoughtlessly unkind we sometimes are when neighbors of ours suffer misfortune! Troubles are bound to come to us all in some shape or form and when we say about our friends and acquaintances today may apply to us tomorrow. News is no respecter of persons. We are prone to consider the ways of others not our ways when we should be watching our own step. What folks say of one another sometimes hurts more than anything they could have done. News, good or bad, grows and becomes exaggerated and distorted with peddling. When the news is good it makes no material difference how it is exaggerated or distorted—it can never do anyone positive harm. But bad news, given wings, may bring sorrow and ruin upon people who are certainly not deserving of a punishment beyond the penalty of their mistake. More charity for others will mean more charity for ourselves and we will gradually come to take a keener delight in reporting something good of some person than something bad. Good is constructive, bad is destructive. Just before you are about to let out a piece of "bad news" stop and think a moment. See if you can't think of something good to say in place of it. The chances are ten to one that you can and that you will.

SURE WINNER
IN ALBERTA

Were the laws more favorable the province of Alberta might build up a tremendous carbon black industry with its wonderful gas flows from the Montana border to the Fort Norman oil fields. Nearly every structure in Alberta carries gas in large volume, drilling records reveal. In view of the large amount of carbon black used in America and of the large quantity of natural gas along the coast, both in Montana and Alberta, it is worth noting that any process by which this natural gas could be converted into carbon black would be of interest. In a new process invented by Chauncey Matlock, of Brooklyn, New York, the natural gas is blown into a chamber in which incomplete combustion takes place, the products of this incomplete combustion being rapidly removed and then blown into a bargehouse in which the carbon black is recovered. The patent has been assigned to the Munroe Louisiana Carbon Company, of Munroe, La. Improved methods will greatly increase the output of carbon black, which is in great demand. The Fulton County Times, telling of the industry near Baker, relates: "The Baker Gas Products company, for instance, this week, shipped four carloads of carbon black to England, the cars containing 74,000 lbs. of carbon black. The above company also sent thirty cases of carbon black to Australia, the cases containing 4,500 lbs. This means that the foreign companies know the high value of the Baker carbon black and buy as much as they can possibly get. That the gas company's product is in great demand in other places is shown by the orders placed with the company, and the demand can hardly be satisfied with the output of the plant as it now is. The natural gas contains a great number of chemicals and the erection of several chemical plants is contemplated in the state to draw out the different substances."—Montana Oil Journal.

THE ART OF
CONVERSATION

It is perhaps a mistake to reflect upon our talking at all. Those with whom we talk most happily and eagerly probably do not reflect upon it. When we do reflect, however, we are likely to think at first that we have discovered the great secret. We see that the worst bores are those who talk perpetually about themselves, about their health, their children, or all the little affairs of daily life that

are of immense interest to them, but of little interest to us. Therefore we conclude that to avoid being a bore we must avoid talking about ourselves. We cultivate a deep and sympathetic interest in others' lives. We listen and the art of listening is undoubtedly a very important element in the art of conversation. We encourage the merchant to talk about his wares, the artist about his pictures, the physician about his cases, even the mother about her children, with their own certain require herculean fortitude. Then we flatter ourselves that everyone likes to talk to us, and that we are masters of the art of conversation. Beyond dispute, that device goes a long way. A patient, attentive, and best of all, a suggestive listener, can never be a bore, can rarely be other than welcome. Yet it is doubtful whether such artists are quite as successful as they think they are. A man, even when he is absorbed in his own work, does not want to talk about it. The man who is most bustling over with their own personality grows a little suspicious of one who does not bubble over at all.

What if this pleasant listener is mocking inwardly, is taking your gauge and refusing to give his own, is merely studying in you what he takes to be the measure of human folly? Now, nothing will convince him so surely as suspicion of any kind. It may be, therefore, that the true art is rather one of give and take. A good bargain is good for both sides, and in a good talk you must say something as well as hear something. The greatest bore talks about himself, but those who are most charming and sociable and who are most sought after usually talk about themselves also. If the difference is a matter of art, it cannot at any rate be acquired, but comes fresh and eternally doled out from the hand of great, creative nature. The most important part of conversation—keeping silent—can be learned by any one. The rare and exquisite gift of being always listened to with pleasure cannot be imitated; it can only be admired.

POSTAL COOPERATION

One way in which you can cooperate with the post office is in the careful preparation of your letters and parcels. Do not put unprotected letters or other business objects in the mail, as it is apt to lead to the envelope being broken, and perhaps the loss of the contents. Never enclose letters in parcels, as this is contrary to postal regulations.

When packing your parcels, do not use an ordinary shoe box, as this is no good for enclosing a parcel going by post. Use a strong double corrugated box, or several layers of strong wrapping paper, and tie the parcel well with cord. If you are sending china, a hat, or other fragile articles by post, be sure to mark your parcel "Fragile" then the postal employees will know that the contents are easily damaged. If your parcels are going overseas, be sure to pack them with special care, as owing to the conditions under which they have to be carried, they otherwise run great risk of damage or loss of contents.

Ask at the post office for a circular describing in detail how to pack and wrap parcels. Remember, if a parcel is worth mailing, it is worth proper wrapping.

FOR THE BLIND

The art of theft is not confined to any one race or class. It is to be found among all peoples and everywhere, and one need not be surprised if in times like these, when so much emphasis is being placed upon the necessity and value of economy, enterprise and initiative, some new applications of the old proverb are being developed. For instance, a Hibernian storekeeper who sold small truck and whose place of business did not look over prosperous, hit upon a plan. One day his shop put on new array in the way of a gorgeous new blind.

"Nice blind of yours, Isaac," quoth his neighbor.
"Yes, Aaron."
"Who paid for it, Isaac?"
"The customers," said Aaron.
"What?" The customers paid for it, Isaac?
"Yes, Aaron. I put a leadle box on my counter, with a sign, 'For the Blind,' and they paid for it."

KILL WEEDS BEFORE
THEY USE MOISTURE

It is never too early to start summerfallowing after the land is fit to work, says James Murray, district agriculturist. As a matter of fact, unless some work, discing or cultivating, is done on the summer fallow early enough to kill the weeds while they are small the main object of summerfallowing is defeated.

Order your counter check books from The Times. Prompt service; lowest prices.

MAGIC
BAKING
POWDER

Magic Baking Powder is scientifically made and has never failed to give the maximum leavening efficiency. Because of this and the uniformly satisfactory results obtained by its use we recommend it as Canada's perfect baking powder.

Greenfield Feels Hopeful,
Conditions Not Hopeless

Ottawa, May 14.—"Serious but not hopeless," was how Premier Herbert Greenfield of Alberta characterized the agricultural situation in the west here today, particularly as regards his own province. Premier Greenfield, who has been in Ottawa over the week end, has gone to Montreal to interview Sir Henry Thornton, president of the Canadian National railways, regarding the rate on Alberta coal.

The Alberta premier said that a \$9 rate from Alberta to Ontario was prohibitive. He was emphatic that the coal question was merely one of transportation. He emphasized that Alberta coal has displaced American anthracite in Winnipeg and he was equally emphatic in declaring it would do the same in Ontario if given a chance to demonstrate, as had been done in Winnipeg. "We have the coal and Ontario needs it," was how the premier summed up the situation.

Premier Greenfield, while talking about agricultural conditions in his own province, said the farmers there had had some hard knocks from different directions. The drought in southern Alberta, south of Red Deer, had been serious, and the operation of the Fordney tariff had temporarily knocked the cattle industry end-wise. But he spoke in glowing terms of what he had seen in Winnipeg last week in company with Premier Dunning of Saskatchewan, and Premier Bracken of Manitoba—one thousand head of cattle, sorted and graded as to size, color, weight, horned or dehorned, all for shipment to Great Britain as a result of the removal of the embargo. He said these cattle were being shipped across in uniform car lots on the cooperative marketing plan.

Premier Greenfield was emphatic that the removal of the embargo on cattle to Britain would considerably mitigate the effect of the Fordney tariff and in that he saw reason for considerable gratification as regards the west. Seeding was well on in Alberta when he left, ten days ago, said the premier, and he thought it was a tribute to the pluck of the men some of whom, he said, have not had a crop from three to five years, that they were prepared to still carry on with it.

A Charming Woman is Healthy

Here and There

Each acre of corn grown in Ohio costs on an average \$626 hours of labor.

Canada is now second on the list as an exporting land, the per capita being \$106.53 per annum.

A new station is being built by the Canadian Pacific Railway at Fredericton at a cost of \$50,000.

Half a million Canadians look to the forests every day for their meals and lodging, and more than 100,000 Canadian workmen are engaged in converting forest products into one form or another.

The large party of Hebrideans who were brought to Canada on the Canadian Pacific Steamships "Metagama" and "Marchoff" have gone to Red Deer, Alta., where they will form an agricultural colony.

Seven hundred farmers and farm laborers arrived in Canada recently on the Canadian Pacific steamer "Montana." These colonists are proceeding to Ontario and western points where they will take up farm work.

The project of a ship canal across Scotland from the Clyde to the Firth of Forth was brought to the fore again at a recent meeting of the Mid-Scotland Ship Canal Association, and there is a possibility of something being started in this connection in the near future.

A single pair of potato bugs would, without check, increase to 60,000,000 in one season; the hop aphids, developing thirteen generations in a single year, will, if unchecked, to the end of the twelfth generation, have multiplied to ten sextillions.

Canadian air pilots flew 294,410 miles carrying 9,153 passengers and 77,540 pounds of freight in 1922, according to a report of the Canadian Air Board. Saskatchewan pilots led in the Dominion, carrying 3,222 passengers. Ontario pilots carried 1,622 people, and British Columbia pilots 1,122.

A company has been formed in London to exploit sunken treasure in the Bay of Biscay off the west coast of Greece. The promoters state that there is a matter of \$45,000,000 in loot and other forms still at the bottom of the Bay, where it was sunk with the united fleets of Egypt and Turkey by the united British, French and Russian fleets in 1827.

Last summer 4,000 forest fires cleared away at least 100,000 acres, many trees as were cut down for lumber, pulp and paper, and all other industrial purposes. A very large percentage of the fires were caused by careless campers and sportsmen who "thought it would die out" or cast away a lighted match or cigarette end.

Improvement of camping facilities at Banff for automobile tourists is now being made. The Mount Rundle camp site is being improved and enlarged, and will be equipped with all modern appliances. It is expected that as a result of the opening of the Banff-Windermere road this year, the tourist traffic through Banff will be the heaviest ever recorded.

At the annual meeting of the Canadian Pacific Railway, President E. W. Beatty pointed out that prospects for the immigration into Canada of the class of colonist urgently needed to develop the country's natural resources were much brighter than they had been in the past two or three years, and an increased traffic from Great Britain and Northern Europe was indicated by the largely increased western movement on the company's ships during the past four months of this year.

If you have a bit of news, send it in; or a joke that will amuse, send it in; a story that is true, an incident that's new, we want to hear from you, send it in; never mind about the style, if the news is worth the while it may help to cause a smile, send it in.

"A pleasure shared is a pleasure doubled." So when you drive out on Sunday afternoons this summer, remember that you are not going to burn any more gas if that empty back seat or two in the touring car is filled with a neighbor or so, who would otherwise stay at home—Exchange.

OVER 100 FAIRS
SCHEDULED FOR
COMING SEASON

A saving of \$46,000 to the provincial treasury will be effected this year in the cuts on grants to be made through the application of the model price list. In the case of the Edmonton and Calgary exhibitions, a flat grant of \$5,000 each will be made, and with these included the total to be paid out by the province on this account will be \$100,000, as compared with \$146,000 last year.

Further economies, which will not be directly felt until next year, will be secured through the new cuts on membership and prizes. The earnings in this year's fairs, upon which the 1924 payments from the province will be based, will be on the basis of twenty-five cents for each member, instead of fifty cents, and 50 per cent on the prize money of the previous year instead of 60 per cent, as heretofore.

Partly offsetting these cuts, in the case of the smaller fairs, will be a provision that the government's

grants will be paid to fairly with a minimum expenditure of \$300, instead of \$500 as before. All these new schedules have been fixed by the government in consultation with the Alberta Fairs Association.

The list of exhibition events for the present year numbers 104 fairs in the province. So far as is known to the government at present, says Hon. George Headley, it is the intention of the local fair associations to hold all these events, but some of them may be cancelled later on, as was the case last year.

Lost Her Appetite
SAT DOWN AT TABLE
BUT COULD NOT EAT

If you have a variable appetite, a faint gnawing feeling at the pit of the stomach, unsatisfied hunger, a heaving of food, rising and souring of food, headaches, etc., you must look to your stomach as being the cause of your trouble.

BURDOCK BLOOD BITTERS will regulate the stomach, stimulate secretion of the saliva and gastric juice to facilitate digestion, remove acidity, and tone up the entire system.

Mrs. J. H. Barker, Gainsford, Alta., writes:—"I was troubled with loss of appetite, and was badly run down. I would sit down at the table, but could not eat anything, also I could not do any work. I tried Burdock Blood Bitters, and after taking half a bottle I found I was eating better, and after having taken two bottles I could hardly get enough to eat. I certainly will praise B. B. B."

Get the genuine; put up only by The T. Milburn Co., Limited, Toronto, Ont.

THE Quaker Flour motto means what it says. The Quaker standard is the highest in flour milling, and this standard is rigidly maintained in every bag. First comes the careful cleaning of the grain, then a milling process possible only with the most modern equipment, and finally the constant laboratory and baking tests.

"The happy baker uses Quaker"—because its consistent uniform quality guarantees unvarying success. Equally satisfactory for bread, cakes and pies.

First Woman Graduate in Agriculture

The first woman graduate in Agriculture from the University of Alberta was given her degree last week. She is Miss Sheila Marryat, sister of Hon. Mrs. Parley, minister without portfolio in the Alberta government, and lives at Alky, Alberta. For two years Miss Marryat was a student at Oids agricultural college, and previously had taken a short course at Guelph. She has just completed a three year course at Alberta University.

Attracting Tourists and Settlers

Alberta will be officially represented during the next two weeks, on the tour that is being made of the larger centres on the international highway through the western States, by Colin G. Grouff, provincial publicity commissioner. This tour is for the purpose of bringing attention to Alberta loop of the international highway, with the object of attracting to the province a large proportion of the immense tourist traffic that passes over the great highway. This highway has, for its southern bases the Grand Canyon and Los Angeles, with Edmonton and Calgary and Banff as its northern bases. The opening of the new Banff-Windermere road this summer makes it possible for the tourists to make the complete 4000 mile circle by auto. During the trip a great deal of publicity material on the province in general will be distributed since the states to be visited are also fertile fields for good settlers, particularly for the irrigated sections.

Mental Hospital to Open in Fall

The opening of the mental hospital at Oliver, now nearing completion, will be postponed until next fall, as a measure of economy. It is planned to remove the mental patients at Red Deer hospital to the new wing now completed at Ponoka, where they will be cared for until the new Oliver home is opened. This arrangement will effect a considerable economy. The Red Deer home is to be used for mental defectives.

Occupational Work for Patients

Unusual success has attended the introduction of occupational work for the patients at the mental hospital at Ponoka, which has been under way

since the first of the year. This work is in charge of Miss Dingman, of Calgary, for three years in charge of similar work for the Soldiers' re-establishment board. Miss Dingman now has a large class each day among the patients at Ponoka, in all varieties of basketry and wicker work, and the work turned out by the patients is a marvel of perfection, affording a striking example of what can be done in this way by patients confined in such an institution.

The object of the work, primarily, of course, is to benefit the patients mentally by giving them something upon which to concentrate. The work has proved very beneficial to the patients. The products are sold at reasonable prices, and thus a fund is created to purchase comforts for the patients themselves. The work is not on a commercial basis, since the patients are transferred often to other work when they become proficient in wicker work. The products include baskets of all kinds and patterns, wicker cradles, tea trays and many other articles of similar class.

Miss Dingman, who is in charge of the class, states that among the patients she finds many apt pupils. The work turned out, evident on the face of it, is of the very highest class.

Alberta University Convocation. Convocation at Alberta university took place during the past week, when graduates were given their degrees. A total of 118 degrees were conferred and 14 diplomas presented, the graduating class being the largest in the history of the university. The convocation during the term was 1214 students. The convocation address was delivered by Dr. Plackett, director of the Dominion Observatory, at Victoria B.C.

Homesteads Filled On. Since the first of the year a total area of 58,000 acres in homestead lands has been filled on at the Dominion land office in Edmonton, indicating a considerably greater improvement than has been the case for some time.

Party of Dutch Settlers. A small party of Dutch settlers reached the province last week, and will be located for a time at Strathmore, with the C.P.R.

Improving Highway. The public works department is undertaking the reconditioning of a large portion of the highway from Calgary to the border, preparatory to the coming of tourist traffic from the States this summer.

The Dominion government is undertaking some road improvement this year in the Jasper National Park west of Edmonton.

Telephone Convention

The third annual convention of Canadian telephone men will be held in Edmonton in August. R. D. Baxter, superintendent of the Alberta government system, being the president of the association. Delegates from all over Canada, as well as some from the mountain states, will be present.

Visited Hebrideans

Hon. George Hoadley, minister of agriculture, visited the colony of settlers from the Hebrides, who arrived at Red Deer recently. Mr. Hoadley extended the newcomers a welcome on behalf of the provincial government, and placed at their disposal the advice of the experts of his department in assisting them to adapt themselves to farming in the new land. There are between 40 and 50 families in the colony. Mr. Hoadley, in conversation with the leaders emphasized his opinion that an emigrant should be made to obtain a block of homestead land sufficient to establish the entire colony, so that none of the money from their slender resources should have to be paid out in purchase price for land, but rather using it for the purchase of stock and equipment, which was now reasonably priced in the province. Mr. Hoadley also dwelt upon another feature of the situation with respect to the colony, and that was the development of the manufacture of homespun, or Harris tweed for which the Hebride Islanders are famous. The colonists possessed in this one thing alone, a means of providing themselves with cash, which would aid them in getting established. Mr. Hoadley dwelt upon the possibilities of such an industry, and was told by Father MacMillan, one of the leaders, that practically every woman, young and old, could weave the cloth. Two or three looms and several spinning wheels have been brought out by the colonists.

Alberta Agricultural Students. Considerable success has come to two students in agriculture from Alberta recently. They are C. B. Sanford and Mr. Dingwall, both of whom have just been granted scholarships by the university of Minnesota. Mr. Sanford graduated from Alberta in 1921 and for two years he was associated with the department of field husbandry, more particularly making

ALBERTA CREAM

STANDARDS SET

The cream standards for this province which are in effect this month, are uniform with those which have been adopted in Saskatchewan and Manitoba. The principal change from the previous standards in Alberta is that in the first grade the minimum acidity is now placed at .60 per cent as against the former .55 per cent.

Summarized the cream grades are: Table-Sweet, clean flavored, non-frozen cream, bought for resale for household use, produced under conditions required by municipal regulations. The acidity shall not be more than twenty one-hundredths (.20%) of one per cent. The term may be supplemented by "inspected" or "Extra special."

Special Grade—Clean flavor, of uniform consistency, suitable for making special grade butter. Acidity not more than thirty-five one-hundredths of one per cent.

First Grade—Reasonably clean flavor, uniform consistency, acidity not more than sixty one-hundredths of one per cent.

Second Grade—Any cream that does meet requirements for next higher grade, such as bitter, stale, musty, metallic or otherwise unclean in flavor.

Off Grade—Cream with very objectionable odor or flavor such as kerosene, gasoline, stinkweed, onions or such flavors as may render cream unfit for making second grade butter.

special study of the potato scab problem. He continued his studies of this at Minnesota, his fine work winning for him a scholarship. Mr. Dingwall has been carrying on work in milling and baking investigations.

Of the four students in first class honours at the university during the past term, two were in the 6 year combined course in arts and agriculture, and one, Andrew Cairns, of Kitcoy in the course in agriculture. Mr. Cairns also won the Governor General's gold medal.

Also Light Grey Mare, 5 years, branded F on right shoulder, both are gentle and halter broken, and weigh about 1200. Wm. Ekerman, Poundkeeper, Duhamel, Phone 1811. 10-21.

Quick Results

May be depended upon for the use of our Want Ads. The births, deaths, marriages and other Classified Columns are usually included in even a very perfunctory perusal of the paper. They are as good for general business as they are for "Help Wanted," etc.

MUNICIPAL DISTRICT OF BIGSTONE, No. 459

Notice is hereby given that if all arrears of taxes imposed in 1922, in respect of parcels of land situated within this Municipality are not paid on or before the first day of July next, such land will be dealt with under the provisions of the Tax Recovery act of 1922, with a view to obtaining certificate of title in the name of the Municipality in respect of such parcel.

E. N. RATNAP, Secretary Treasurer, M.D. of Bigstone, 459-10-14.

CITY OF WETASKIWIN

VOTERS LIST, 1923 - 1924

NOTICE is hereby given that a list of Electors for the CITY OF WETASKIWIN and the Wetaskiwin SCHOOL DISTRICT is now being prepared. All those who are qualified and entitled to vote at Municipal Elections in the City of Wetaskiwin are requested for the purposes of registration to register their names, at the CITY OFFICE, during the month of June between the hours of 9 a.m. and 5 p.m., of each day except Sunday.

J. E. FRASER, Registrar of Electors, City of Wetaskiwin, 9th May, 1923. 8-14.

NOTICE TO CREDITORS

In the Estate of William D. Cornagey, Sometime of Yorkford, Alberta, Deceased.

All persons having claims against the Estate of the late William D. Cornagey of Yorkford, Alberta, are hereby requested to file the same forthwith with the undersigned as Solicitor for the Standard Trusts Company, of Edmonton, Alberta, Administrator of the said Estate.

Dated at Wetaskiwin, Alberta, this 23rd day of May, A.D. 1923. 10-14.

ALEX. KNOX

Notice to Creditors

In the Estate of Albert Simpson, Deceased.

Notice is hereby given that all persons having claims upon the estate of the above named Albert Simpson, late of Everett, Washington, who died on the 25th day of October, 1922, are required to file with E. D. H. Wilkins, of Wetaskiwin, Alberta, Solicitor for the Executor, by the 23rd day of June, 1923, a full statement, fully verified of their claims and of any securities held by them; and that after that date the Executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to her attention.

Dated at Wetaskiwin, Alberta, this 14th day of May, 1923. Ernest D. H. Wilkins, Solicitor for the Executor, 9-21.

MUNICIPAL DISTRICT OF LLOYD GEORGE, No. 457

NOTICE

To All Whom It May Concern:

Please take notice that H. Milton Martin, Commissioner, appointed by authority vested in the Lieutenant Governor in Council by Chapter 22 Statutes of Alberta, 1919, and amendments thereto, will hold a Commissioner's Sitting at 729 Tupper Building, Edmonton, at the hour of 2 o'clock in the afternoon of the 26th day of June, 1923, at which time will be considered the application of the Municipal District of Lloyd George No. 457, made to the said Commissioner under the said Act and among other matters covered by the application are the securing by the said Municipal District of Lloyd George clear title to the undermentioned properties either by purchase or otherwise and the cancellation of the plans thereof.

North East quarter of Sec. 23, Township 46, Range 20, West of the 4th meridian, Industrial Tracts subdivision Plan No. 3241A.T. All parties interested in any of the above properties may appear in person or be represented at the Commissioner's sitting aforesaid.

By Order, E. COLEBRIDGE ROPEL, Secretary Treasurer

Approved: H. MILTON MARTIN, Commissioner

Young People's union service at Malmo at 2 p.m.

Alberta Resources Yield \$5,892,000 in Five Years

The total revenue derived by the department of the interior from the province of Alberta in connection with coal, petroleum, natural gas, grazing leases and sales of land over a five years' period passed has been \$5,892,054, and the direct cost of collecting this has been \$68,113. This cost of collection, however, does not take into account a number of indirect charges which ultimately would enter into the cost of administering the Dominion lands and other resources in Alberta, and the collection of revenue.

These statements were made in the house by Hon. Chas. Stewart, minister of the interior, in reply to H. R. Spencer, progressive member for Battle River. The minister added that in connection with the administration and collection of revenue referred to a proportional amount of the expenditure incurred by land patents, mining lands in the Yukon, timber and grazing, Dominion lands and accounts branches should be charged against the province of Alberta. This also applied to a proportion of the expenditure of officials of the department in connection with the administration of other branches and whose duties and jurisdiction have a bearing on the departmental activities in the province of Alberta. It was, however, said, impossible to estimate with any degree of accuracy the actual amount involved in these proportional charges and any figures which might be compiled could not in any way be looked upon as a true and correct statement of the case.

Miss Poole, of the high school staff is a patient at the hospital this week. Rev. Mr. Schrag is kindly assisting with the high school work during Miss Poole's absence.—Vegreville Observer. (Miss Poole is a daughter of Mr. and Mrs. J. I. Poole of Wetaskiwin.)

At Leduc, on the 16th inst., Louis Clelandski, Dulais post office, west of Leduc, was found guilty of perjury committed at Wetaskiwin last February at the criminal sittings of the supreme court, and was sentenced to two years, less on day, at the provincial jail at Port Saskatchewan.

Irvin Franson, young son of Mr. and Mrs. O. S. Franson, was the victim of a very painful accident on Sunday afternoon when a boy companion accidentally shot him in the leg, just above the knee, with a bullet from a .22 rifle. Irvin was sent home the week end at his father's farm in the Lake Dumay district, and in company with two other lads were out hunting gophers.—Canadian.

It is easy enough to look pleasant, when the spring comes around with a rash. But the fellow who while is the one who can smile when he slips and sits down in the slush.

HILLSIDE

There was a large turnout at the regular meeting of the U.F.A. on Saturday, the 12th. Mr. H. Young gave a very interesting paper on the Pacific Grain trade, which was well received by all present.

The U.F.W.A. of the district are entertaining all U.F.W.A. members and their husbands on Friday evening, June 8th, at the school. Visitors are heartily welcomed.

Don't forget the joint picnic of the Millet and Hillside U.F.A. to be held on the 24th at Millet. A big dance in Pinyon's hall at night. Come all and have a good time.

We are pleased to report that Mike Deering, who has been suffering from ear trouble, is considerably better.

Don't forget the U.F.W.A. sale of home sewing on the 24th at Millet. Lunches will also be served.

Mrs. W. Webb, of Wetaskiwin, is spending a few days at the farm.

MILLET

Sunday services—Porto Bello, 11 a.m.; West Liberty, 3 p.m.; Millet, 7:30 p.m. Sunday school—Larch Tree 10:30 a.m.; Hillside, 2 p.m.; Millet, 11 a.m.

There will be a Sunday school picnic at the "Dairy Farm" on June 9. Kindly prepare a generous lunch basket. A real good time is expected.

Rev. Hughson is bringing his lantern lectures to a close this week, having already visited Larch Tree and West Liberty schools as well as Millet, last week. On Wednesday night the lecture entitled "An Evening with Shakespeare" and "David Livingstone" will be given in the Millet school. This has been a real educational year. On an average of two lectures a fortnight have been given to appreciative audiences.

This year brought to a close the pastoral term of Rev. Hughson, who will attend conference as the alternate member of the stationing committee. Mr. T. Aikens was appointed by delegate and Mrs. I. N. Hughson alternate delegate.

We are indebted to Mr. H. A. H. for a deficit this year, but he is sincerely hoped that an earnest effort will be made to reduce the amount as far as possible.

Miss Eva McKitterick, B.Sc., teacher of Wetaskiwin High school, spent the week-end visiting Miss Watt and Mrs. H. Brinkner.

Lacombe, May 21.—While breaking land on his farm near Lacombe, Archie Chiswell plowed up a human skull. Medical men who have examined it say that it has been in the ground for seventy years, and that the owner of the person was at least forty years. A hole in the base of the skull leads to the suspicion that the person came to his death by receiving a blow on the head.

Here and There

45,000,000 bushels of grain awaited the opening of navigation at Port William and Port Arthur this spring.

Flood conditions in New Brunswick and Maine this spring were the worst since 1887.

Damage to Canadian Pacific property in Western Canada by floods this spring amounted to approximately \$200,000.

Calgary is the leading telephone city on the continent with one instrument to every 4.10 persons. The phones in this city are automatic.

The per capita debt of Canada is approximately \$165, as compared with \$250 for the United States, \$260 for Great Britain, \$350 for France and \$250 for Australia.

Canadian Pacific steamers "Merloch" and "Metagama" docked at St. John with over 900 Hebrew immigrants to Red Sea, Alberta, and various parts of Ontario.

The 1923 cruise of the Albatross Club of Canada will be held in Lake Superior, near Moraine Lake, nine miles from Lake Louise in the Canadian Pacific Rockies.

Travelling 572 knots in twenty-four hours, an average of from 24 to 24 knots per hour, the Canadian Pacific liner "Empress of Canada" recently established a record for commercial vessels on the Pacific.

The last link in the great 6,500 mile scenic tour through Western Canada and the United States will be thrown open to traffic on June 30th when the Pacific-Winnipeg-Mojor Highway will be officially opened.

A car of timothy and grass seed arrived in Vancouver via Canada Pacific Railway from Toronto ten days after an order had been wired to the Ontario Capital. This constitutes a record in service.

In architectural style the new Basilica at St. Anne de Beaupre will be a combination of the Roman and the Gothic. The steeples in front will be 225 feet high and including those in the chapels the new Basilica will contain twenty-six spires.

LAMENT OF A TURKEY

I was sitting on my cosy nest,
Beneath the shady trees,
Thinking of the eggs I laid,
When my mistress said to me,
"Get out of here and go to roost,"
"Tis nine o'clock, and I
Don't want you sitting here.
I want some more eggs, you bet,
By and by I'll let you set."
She chased me up and all around,
I would not go in, I was bound
I'd stay just where I pleased, and so
Upon the barn I flew.

"All right," said she, "stay if you like
I shall not bother for tonight."
By the window two boys sat
And watched the turkey flying past
And said they "I never saw
An owl as big as that before."
One jumped up and got the gun
And out he went, on the run.
Thinks he to himself, "an owl it can't
be,
For sure looks as big as an eagle to
me."

He met my mistress coming in,
And said, "Keep that darn dog still!
It was setting dark and she did not
know
He had the gun and so
Into the house she went and said,
"I've caught that turkey till I'm near-
ly dead,
It's roosting on the roof of the barn
And there it can stay till the morn-
ing."
"What's C.D. doing out so late?"
The other answered, "He has gone
To shoot that owl on the barn."

"Tisn't an owl, 'Tis my turkey," said
she.
And out of the house went as quick
as could be.
But ere she reached him a shot rang
out.
The turkey just fluttered as life
went out.

"You've shot my turkey," she mourn-
fully said.
"You'll have it for dinner on Sunday
said he.
'Twould choke me to eat a bite, said
she.

It was a lovely dinner, everyone said
We won't forget it, no matter how sad
My mistress feels, when she thinks
I might as well have been left to rot.

Competition For FREE CHILDREN'S PHOTOS

FROM MAY 25th TO JUNE 30th INCLUSIVE

1. Anyone may compete by having one or more children photographed at The Walin Studio.
2. Photographs will be the prize given free to the winner of the competition.
3. The value of the photos given free to the prize winner will be whatever amount is paid down at the time of the sitting, say \$5.00 will, if later found to be the lucky prize winner, be given \$5.00 worth of photos free, and the \$5.00 will be refunded. In other words, the prize you stand a chance of winning is just whatever you pay down at the time of sitting.
4. The usual privilege of re-sitting without extra charge will be given if the proofs are not satisfactory.
5. The competition lasts 37 days. On the first day 37 chances will be given and thereafter one chance less will be given each day until on the last day one chance will be given. Come in early and get a lot of chances.
6. The chances will be dropped in a sealed box and on June 30th some prominent business man will draw to decide the winner.
7. At least \$3.00 must be paid down at time of the sitting.

An Enlargement Worth \$4.00 will be Given Free With Every Order amounting to \$8.50 or over. This applies both to Prize-winner and Non-Prize-winners.

BOXING THE COMPASS

Captain E. Landy, Commander of the Canadian Pacific liner "Melita" was at some pains to explain to one of his passengers the mysteries of the compass. Dick Anderson, the favoured traveller, was the youngest member of a party of boy immigrants from Dr. Barnardo's Homes. He has been received into the North Toronto Home and is in the process of being turned into a first class Canadian citizen and worker.

RECIPROCITY WITH THE U.S.

IS PART OF FIELDING'S PLAN

Ottawa, May 11.—Hon. W. S. Fielding, minister of finance, in submitting his budget proposals in the house of commons this afternoon, announced plans which he hoped would lead to reciprocity with the United States. He proposed to include a clause in the customs tariff which would authorize any Canadian minister to enter negotiations with any authorized representative of the United States with a view to making a commercial agreement with the United States. He further proposed that if the president of the United States, under authority of the United States tariff

act of 1922, determined to reduce by 50 per cent, the duties on cattle, wheat, wheat flour, oats, barley, potatoes, onions, turnips, hay and fish, the Canadian government would be authorized to make "such reductions of duties on similar articles imported into Canada from the United States as may be deemed reasonable by way of compensation."

The minister proposed considerable reductions in excise taxes. Sales taxes are to be changed. They will be imposed at the source. They will be six per cent, and will apply to imports and to home manufactures.

City of Many Disasters Stricken as Never Before

Hot Springs, Ark., May 15.—Hot Springs, city of many disasters, was stricken last night as never before when water and flames united in a general devastation that left death and disaster in its wake. How many dead is unknown.

Water in torrents split the city into three sections. Flames followed in the path of the flood and at nightfall water covered all sections before a summary could be made. There was not a body reported at the morgues late last night.

The flood originated in the upper basin of the mountains north of Hot Springs from a veritable cloudburst. About 4.30 o'clock, after terrific rains for about eighteen hours, there came a slight flow of water down through Central avenue from its junction with Whittington park at the north end of the valley. When the water first appeared there was little alarm but in a few minutes the water began to rage down the valley.

Automobiles began to find difficulty in the high water and soon found travel impossible. A few minutes later they were being whipped about on the waves of a raging torrent, and it was from these the most effective rescues were made, for the persons who remained in their cars too long were unable to leave them.

The water coursing down Central avenue was from eight to nine feet deep but it was not the depth so much as the speed with which the water came that most havoc was wrought.

Fronts of stores were smashed in and even the asphalt pavement was torn up and thousands of dollars' worth of merchandise floated on the waves.

PUTS "O.K." ON ALBERTA COAL

Toronto, May 21.—The committee appointed by the Ontario government to try out Alberta coal reported today that the best grades of Alberta coal would be a satisfactory substitute for United States hard coal. The committee was composed of J. A. Ellis, fuel controller; C. H. Mitchell, of the University of Toronto, and R. P. Fairburn, deputy minister of public works.

Importation, in the minds of the committee, would not be satisfactory unless Alberta coal could be delivered in Toronto at \$12.50 per ton as compared with \$15.50 for United States anthracite. A ton of Alberta coal will not last as long as anthracite, and it takes one and one-quarter to one and one-half tons to equal a ton of the hard coal.

CAMROSE WANTS VIKING GAS

The report of the tremendous flow of gas at Wainwright has started some of our citizens discussing the possibilities of securing a supply of this valuable commodity in the near future. It is claimed that the well has a capacity of thirty million feet per day, and if this is true, it will be equal to the best in Canada.

Wainwright is 54 miles east and 12 miles south, or about one hundred miles distant from Camrose. The Viking field is much nearer and has several producing wells. These are 51 miles east and 10 miles north, or a total distance of fifty-five miles from Camrose. Edmonton is to get her supply from this field and it is only natural that Viking gas will be piped first. The proving of the Wainwright field is important in more ways than one. Wainwright and Viking are about forty miles apart, and the probabilities are that gas may exist under all the intervening territory. In that event, the possibilities of the field will be incalculable. As oil and gas are generally found close together the recent find will be additional incentive to continue the search for oil—Canadian.

Terrible Headaches And Dizziness

Miss S. Rapinod, 227 Kneilworth Ave. N., Hamilton, Ont., writes:—"I used to suffer from terrible headaches and dizziness. Last summer, while I was walking up a side street, I got a dizzy spell and fell in the middle of the road. An old gentleman helped me to get to where I was going and told me to get a vial of Milburn's Lax-Liver Pills. Well, I did, and they did wonders for me. I don't know how to thank you, as I don't get headaches or dizzy spells any more."

When your liver gets sluggish and inactive your whole health suffers, and the only way to keep well is to keep the liver active and performing its proper functions by using Milburn's Lax-Liver Pills.

Price 50c a vial at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

TO DRAIN LITTLE HAY LAKE

It is now evident that Little Hay Lake will be drained this summer, also a number of smaller lakes and sloughs that have a fall into the main ditch. Mr. Jones, of Edmonton,

contracted for the main ditch which will be four miles long, and comprises approximately 45,000 cubic yards. Jones will bring up a machine for this job. He undertook the work at 22 1/2c per yard. It is very likely that the farmers will be given a chance to

drain the branch ditches, that comprise about 40,000 cubic yards. Thirty small bridges and a few large ones which A. Person, of Hay Lake, received the contract to build. When the system of ditches, which the job is completed about 2,000 acres of most fertile land will be laid dry.

A Girl's Face Is Her Fortune

Palm and olive oils—nothing else—give nature's green color to Palmolive Soap.

Because it is the greatest of all womanly charms, a skin which is fresh, smooth, and alluring with the radiance of health, predicts a happy future.

Don't be content to have a lifeless, sallow and blighted complexion—begin at once to remedy these defects.

Every girl can have a beautiful attractive skin if she will only learn to give it proper care. Thorough cleansing with a fine mild soap once a day, is the secret. Cold cream is beneficial when applied to a clean skin, and rouge and powder are harmless beautifiers—but start fresh every day on a clean foundation. Keep your skin active and it will be clear, fresh, youthful and attractive.

Soap to be thorough need not be harsh. The mildest toilet soap is the most thorough of cleansers, as you will know after you try Palmolive.

Its mildness and thoroughness are due to the same source—the scientific blending of Palm and Olive oils, the natural cleansers discovered thousands of years ago in ancient Egypt and made use of by Cleopatra.

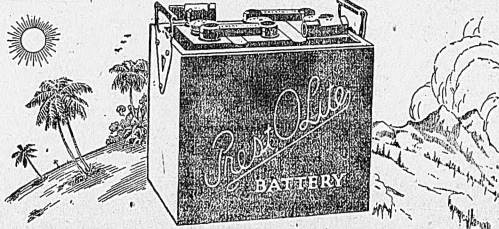

Palmolive freshens, livenes and stimulates the skin, leaving it delightfully fresh and rosy.

You can buy Palmolive Soap at all first-class dealers.

Torrid or Frigid—It's All One to Prest-O-Lite!

PREST-O-PLATES make Presto-O-Lite the all-weather battery, just as they make it the long-lived battery. Heat cannot buckle them nor cold impair their efficiency. In construction, Prest-O-Plates are designed to withstand the abnormal conditions under which batteries are often expected to perform. Prest-O-Plates are found only in Prest-O-Lite Batteries.

The Prest-O-Lite Battery is 100% made in Canada—the product of the largest storage battery manufacturing plant in the British Empire. For that reason it can be sold at a price far lower than its quality would seem to warrant. There is a Prest-O-Lite Battery to suit your car, and a thousand Prest-O-Lite Service Stations in Canada to keep your battery up to full efficiency.

FODDER AND TRENCH
SILOS

WILL INCREASE FARM VALUES

THINKS GEORGE HUTTON

Mr. Hutton, of the natural resources department of the C.P.R., and formerly superintendent of the Lacombe experimental farm, gave a very interesting address at Stettler on Wednesday evening, April 25, under the auspices of the board of trade, on the subject of "Fodder and Trench Silos."

The address was listened to by a large crowd, many coming from surrounding points, in the midst of seeding to be present.

Mr. Hutton in his opening remarks stated that he was the former himself, having operated his own farm since 1907. He had been handicapped in this respect by lack of personal supervision as he was also at the same time superintendent of the experimental farm, but even in those circumstances he had made a success of the farm, and he would prefer being judged by the results on his own place. The experimental farm at Lacombe and at any points are not expected to pay dividends as there are too many experiments being conducted all the time, but while superintendent he had been able to make good profits in some of the departments, especially in finishing cattle and hog raising. As head of the agricultural department of the C.P.R. natural resources, he took hold of 125 farms, ranging from 160 to 10,000 acres, and he has had under those circumstances a very wide experience in mixed farming under all sorts of conditions, both wet and dry.

Mr. Hutton related how he had first come to the Stettler district in 1906, and spoke of the way the hotels were crowded at that time with land seekers. There was in the early days lots of money in circulation and he proceeded to describe why conditions were different at the present day.

He stated that the prosperity of the early days was not built on a solid, economic foundation but on mere passing phases of our development.

1.—There was more money in circulation then because many people were coming into the district with cash and were buying land and equipment, and general business was good for the same reason.

2.—Then came the war and high prices began to prevail. Where hogs were sold at 4 cents they were now 12 or 16 cents. Where land used to be broken for \$250 to \$4, it was now \$14 or \$15 per acre. Where land could first be bought for a nominal sum, it was priced at \$50 per acre during the war for poor prairie. And horses and other live stock also increased by 50 to 60 per cent in price from 1920 to 1921.

3.—Disseminated literature added to the unhealthy land boom, and he had seen some pictures which represented threshing machines turning out gold dollars instead of wheat.

4.—Then came the decline in prices, and with the absence of new settlers and new money in the district, the farmers came to the conclusion that farming was a losing proposition. They had experienced the good times of the early days and the good times of the war thought that conditions in those periods were normal.

The speaker, however, did not agree with this conclusion. He compared our condition in the west with the experience that the pioneers of the east had to go through, and stated that all pioneer conditions were necessarily times of more or less hardship. When it came down to actual facts, the purpose of the pioneer is well served, when he creates a home, his wilderness, instead of making money. It was that way in other countries and will be that way in Alberta. Home building was the first business of the pioneer. The speaker stated that the whole question of building up a home farm instead of merely mining the land was bound up in the farming.

There were 100,000 farms in western Canada today without a cow or without a hog. Too many farmers were buying bacon, vegetables and other articles of food that should be raised on the farm. He did not think that these conditions existed to any extent in central Alberta, but they were of frequent occurrence in the southern parts of the province. By so doing the agriculturist was sowing the seeds of failure right from the start of his farming operations.

Fodder Crops

Cattle and hogs could be made to pay under various conditions without regard to whether the weather was dry or wet. Fodder crops which can be raised where wheat cannot, raise high in yield and will bring a steady income where wheat farming exclusively would starve out the farmer. The most valuable fodder crops

for central Alberta are green oats and sunflowers.

Corn was not a certain crop as yet for this part of the west. At the experimental farm at Lacombe he had raised corn since 1907, but it was a successful crop for only half that time. That is, it made a record of a 50 per cent crop. That was not good enough for a fodder crop which should register a 90 per cent success. Farmers generally knew the value of green oats, and it was not necessary to discuss that subject to any extent. He wished, however, to say something about sunflowers.

The sunflower fodder was proving its worth over most of western Canada. Perhaps it was not as cheap to start with as green oats as it required another farm implement, but no farmer could make a mistake in growing this fodder. Compared with corn it is much superior as a safe crop as it will stand six to eight degrees of frost, and, from a more, and can be planted earlier and cut later. Alfalfa was desirable for both corn and sunflower, and the latter had a far better chance of reaching maturity in our northern climates. In regard to yield under these conditions he would place corn at only 66 per cent of sunflower. In fact, making a comparison between the two, green oats at 31-2 to corn at 8 tons and sunflower at 12 tons per acre, under normal conditions. Alfalfa was the best fodder crop of all but there were also too many uncertainties in its yield. Compared with alfalfa, 2-3 pounds of sunflower were equivalent to 10 pounds of alfalfa. Since alfalfa sold at from \$15 to \$18 the value of sunflower could be estimated.

The speaker claimed that by the use of fodder crops such as sunflowers and green oats, the value of a man's farm would range from \$50 to \$100 per acre, while as a wheat growing proposition he would be losing money.

Both sunflowers and oats, the latter cut in green stage, are found to make suitable silage for dairy cows. A test was made at the dominion experimental farm at Lacombe to compare the value of these two crops for silage purposes. Each of several lots of cows was fed the same amount of corn and kind of grain and as much silage as the animals would consume. The sunflower silage being less bulky than the oat silage, a larger weight of the former was consumed, and at the same time the cows gained more weight.

When sunflowers were fed the cost of producing one hundred pounds of milk was reduced 8 cents, one pound of butter 2.2 cents, and the profit on 100 pounds of milk was 8 cents greater when sunflower silage was used.

At the experimental station at Lacombe, in 1921, sunflower silage was fed against oat silage to dairy cattle. Practically the same quantity of grain was consumed in all cases but more sunflower silage and less hay was eaten by the lots receiving these feeds, and doubtless to the fact that sunflower silage was less bulky than oat silage for a given weight.

When sunflowers were fed the cost of producing one hundred pounds of milk was reduced 8 cents, one pound of butter 2.2 cents, and the profit on 100 pounds of milk was 8 cents greater when sunflower silage was used.

At the experimental station at Scott, Sask., for the same year, a comparison of sunflower silage with turnips for fattening lambs showed (1) silage is a more profitable feed for fattening lambs than roots; (2) roots give increased gains over a straight grain ration; (3) lambs preferred sunflower silage to that made from green oats; (4) while silage fed to lambs was consumed, turnips did not; (5) good growthy lambs will make good gains; (6) oil cake increased the palatability of the ration, besides aiding in balancing it; (7) with the increase in fleshing there was corresponding improvement in grading from the butcher's standpoint.

Mr. Hutton stated that he had made 75 cents per head for dairy cows per day by feeding sunflowers. In 1919 he had paid out \$10,000 for hay for feeding purposes, but by growing sunflowers he had cut this out entirely. He had also made one dollar per acre clear on his lands by this fodder.

Mr. Hutton also went into the question of growing sweet clover and stated that this was a fine fodder under conditions where the moisture was not up to the normal. He had sown sweet clover in 1918 and it had come up for four years, along with the wheat sown the next and succeeding years. The wheat went 35 bushels to the acre, and the clover came up with it. The great benefit of clover is that it builds up the soil, but if a farmer wished to raise sweet clover

LIMBS AND BODY
ALL SWOLLEN"Fruit-a-lives" Relieved Both
Dropsy and Sick Kidneys

The Wonder of Fruit Medicine

Those who know they have Kidney Trouble—who suffer with pain in the back—who are up frequently at night—will welcome the news that "Fruit-a-lives," the wonderful medicine made from fruit juices and tonics, will positively relieve Kidney and Bladder Troubles as proven by this letter.

"Our little girl had Kidney Trouble and Dropsy—her limbs and body were all swollen. We decided to try 'Fruit-a-lives.' In a short time, the swelling went down. Now, she is the healthiest one of the family."

as a fodder it was better to sow it separately as a fodder, while if he wished to build up his soil it was better to sow it with grain.

It could be sown with a grass seed or by hand.

Trench Silos

In recommending the trench silo, Mr. Hutton did not for a moment disparage any of the types of silos now in use as a means of storing feed. They are all good and have certain advantages in the way of convenience of feeding, particularly where cattle are housed, which the trench silo does not afford. They have one disadvantage, however, to thousands of farmers in western Canada, and that is that they cost money, and many men are so financially involved that the cheapest type of ordinary silo is a large item to them, and absolutely prevents them from building such a silo. The trench silo affords a method of storing feed which is inexpensive apart from labor, and most men who are struggling to get on their feet are willing to make an expenditure of their own labor in order to achieve success.

The quality of the feed so stored appears to be quite equal to that stored in the ordinary silo. It may be argued that there is a certain loss of moisture by drainage and the point is doubtless well taken. He had no figures to show the relative loss of silage from the same field cut at the same time and stored, one lot in a trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was assuming that the value of such moisture so lost by drainage is not high, and he was certain that the silage stored in the trench had given excellent results, as he had fed his winter six-five late summer and fall calves in the trench silo and one in the ordinary silo, but he was
